

2013 CTUIR LSRCP O&M Final Performance Report 10/12-9/13
Production Coordination Activities
Agreement #F13AC00030
October 1, 2013

The CTUIR LSRCP O&M Statement of Work is a set of tasks specifically related to production coordination activities under the LSRCP program that are associated with management of fisheries within CTUIR ceded and usual and accustomed areas. The project partially funds a production coordinator position along with the corresponding administrative support and travel required to participate in the various coordination and planning forums directly related to LSRCP hatchery programs of which CTUIR is a co-manager. Following is a bulleted summary of significant activities performed by the production coordinator position during the period that extended from October 1, 2012 through September 30, 2013. No problems were encountered which impaired the ability to meet the agreement objectives.

- Participated in LSRCP Annual Operations Plan meetings for Lookingglass Hatchery (Northeast Oregon) and Lyons Ferry Complex (Southeast Washington).
- Participated in the development of planning and management documents relative to LSRCP hatchery programs.
- Coordinated LSRCP hatchery activities related to CTUIR co-managed programs as necessary with co-managers.
- Coordinated CTUIR BPA projects with associated LSRCP programs.
- Provided review and comment on proposed LSRCP facility improvements and/or changes including Imnaha weir and adult handling facility, Little Sheep passage concerns, Lyons Ferry lakes outlet modifications, and Irrigon water supply issue.
- Provided review and comment on proposed M&E projects associated with LSRCP hatchery programs.
- Participated in other forums and activities related to LSRCP hatchery programs including attendance at both Snake River Fall Chinook coordination meetings (chaired August meeting), the LSRCP ISRP fall Chinook program review, the LSRCP Hatchery Managers Annual Meeting, and the Northwest Fish Culture Conference in Portland, Oregon.
- Participated in NEOR/SEWA/SRCHF recovery planning processes. Including providing review and comment on draft recovery plans and permits. Also served on the Snake River fall Chinook technical team. Although I'm not sure why since this committee was comprised solely (except me) of research scientist types.
- Participated as a member of the Production Advisory Committee (PAC) within U.S. v. Oregon.

- Participated in the Accords process as related to LSRCP programs.
- Provided comments on Columbia basin-wide documents as related to LSRCP programs including the Columbia Basin Hatchery EIS and FCRPS Comprehensive Evaluation.
